What is Figma?

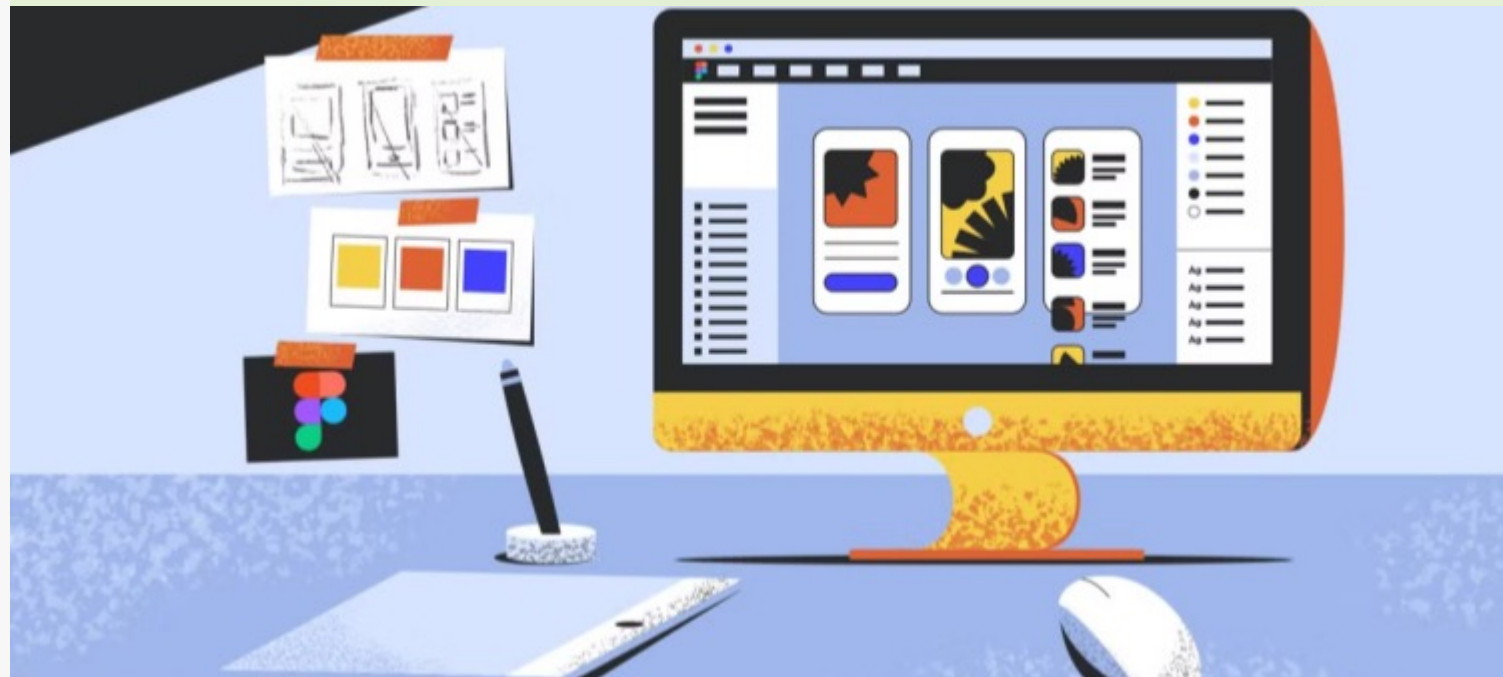

- A powerful WordPress plugin that connects Figma and Elementor
- Instantly converts designs into web templates
- Supports most Figma files with pixel-perfect results

What is Figma?

A web-based design platform built for easy access and seamless collaboration

- Real-time UI/UX collaboration
- Developer handoff with Dev Mode
- Integrated tools: FigJam, Slides
- Accessible on any device
- Scalable from solo use to enterprise

What is Elementor?

A drag-and-drop website builder optimised for WordPress

- Intuitive user experience with live editing
- Easy content placement
- 90+ widgets
- Customisation & optimisation
- Plugin-based feature expansion

Why Figmentor?

Design-Dev gap

Redundancy,
miscommunication, and
inconsistency in
Figma-to-website handoff

Figmentor Benefits

- Faster design-to-web conversion
- Real-time change reflection
- No-code template use
→ Higher efficiency

Agencies & teams

Useful Situations & Considerations

Useful Situations

- Fast design-to-web conversion
- No-code team collaboration
- Simple, small to mid-size projects
- Responsive layouts

Considerations

- Limited JS & customisation
- Inaccuracy with complex designs
- Elementor dependency

**Thank you
for listening**
